Professional Summary

Licensed pharmacist with a tailored experience in managed care and digital health. Specialized in evaluating AI outputs for clinical accuracy, reducing hallucinations and identifying where decision logic breaks down at scale. Broad expertise across the prescription lifecycle but with a deep fluency in PA adjudication logic and where reviewers and providers exploit gaps in the process.

Relevant Professional Experience

Evidence Generation Associate | ***Bluepath Solutions*** **|** Remote **October 2025 – Present**

- Partnered with project leads to develop health care economic information (HCEI) materials, translating payer, reimbursement, and clinical data into decision-ready summaries for biopharma clients
- Conducted literature reviews across therapeutic areas and Medicare policies (340B, GLOBE/GUARD) and synthesized findings to support real-world evidence generation
- Translated pediatric atopic dermatitis prevalence data and ESRD/TDAPA policy analysis into strategic market entry recommendations for biopharma clients

Clinical Advisor | ***Freelance*** **|** Remote **August 2025 – August 2026**

- Designed clinical decision trees and coverage logic for community pharmacy service offerings, forming the clinical backbone of the AI's phone triage capability
- Audited AI-generated triage outputs against clinical accuracy, curating training scenarios from real client interactions, reducing live agent escalation by 60%
- Built the SOP and dashboard for identifying, correcting, and tracking AI hallucinations across implementation, establishing the team's core quality-control process

Pharmacist Advisor, Clinical Operations - Medicare Part D | ***CVS Health*** **|** Remote **October 2025 – May 2026**

- Adjudicate Medicare Part D prior authorization cases across high-PA-burden therapeutic areas (~7-12 cases/hour, 97% accuracy)
- Identified loophole in Part D appeal workflow where non-formulary tier exception denials lacked a defined dismissal pathway resulting in SOP clarification and downstream software workflow update
- Flagged ambiguous GLP-1 coverage criteria (Part D exclusion for weight loss vs. qualifying indications) and developed standardized decision guidance, reducing adjudication variability across the team

Health Economics and Outcomes Researcher | ***UCSF*** | San Francisco, CA **April 2025 – August 2025**

- Partnered with prostate cancer patients and urologists to assess how diagnostic staging terminology influences treatment uptake, bridging clinician decision-making heterogeneity
- Developed manuscript analyzing patient acceptance in risk tradeoffs for artificial kidney implants, translating complex preference datasets into evidence-based recommendations for FDA trial design

AI & Health Tech Innovation Fellow | ***Bitelabs Healthtech*** | Remote **May 2025 – July 2025**

- Owned end-to-end development and launch of rural telehealth GTM strategy, from CDC data analysis through investor pitch, securing MVP commitment from clinician and investor stakeholders
- Built hybrid telehealth prototype using Lovable & Replit, translating clinical workflow requirements into functional technical specifications

Formulary Analyst | ***UCSF/CA Dept. of Insurance*** | San Francisco, CA **June 2023 – June 2025**

- Enforced compliance of CA health insurance formularies by evaluating drug coverage with updated treatment and regulatory guidelines, impacting 24 commercial insurance plans across 12 health plan providers
- Interpreted clinical insights to aid attorney negotiations, achieving 100% contraceptive coverage across all CA student health plans benefiting ~500,000 students statewide

Education & License

- **Doctor of Pharmacy, PharmD –** University of California, San Francisco
- **Biochemistry, B.S; Minor in Design –** University of California, San Diego
- **Active RPh license -** California Board of Pharmacy

Additional Skills

- **Clinical & Payer:** Payer-provider ecosystem, utilization management, prior authorization, 340B, specialty drug coverage, discrete choice modeling
- **AI & Product:** Adobe Suite, Figma, Lovable/Replit, OpenEvidence, Claude Code, QA output eval
- **Technical:** Microsoft Office, Tableau/SQL/R (Healthcare Analytics), EPIC/Cerner/CPRS (EHRs)
- **Interests:** Surfing, Bouldering, Paddling, Travel Planning, Cooking, Formula 1, Trying anything at least once
